EXPERIENCE

Full-Stack Software Engineer, Thinqwin

February 2026 - Present

- Developed and maintained production features for an AI-powered SaaS platform across React web and React Native mobile applications.
- Implemented a major frontend redesign, creating responsive, user-focused interfaces while collaborating with engineering leadership on product direction.
- Built and integrated Node.js/Express backend APIs to support frontend functionality and application workflows.
- Debugged, tested, and resolved issues across web and mobile platforms, improving application stability and user experience.
- Shipped frequent production updates through a GitHub-based deployment workflow in a fast-paced startup environment.
- Collaborated directly with senior engineers and the founder in feature planning, technical discussions, and rapid product iteration.

Student Assistant at Veterans Resource Center, Georgia Tech

August 2020 - December 2024

- Supported veteran students with GI Bill inquiries, document submissions, and office communications.
- Handled sensitive student data and maintained a high level of service accuracy.

IT Intern at Georgia Tech Conference Services, Georgia Tech

May 2024 - August 2024

- Managed IT systems and infrastructure supporting campus summer conferences.
- Provided technical support to staff and event coordinators, ensuring fast resolutions and system uptime.
- Provided and maintained wifi services for 26 youth groups, 37 adult groups, and 508 interns.

Facility Assistant at Campus Recreation Center, Georgia Tech

May 2023 - August 2023

- Monitored patron safety and provided support for facility equipment checkout and logistics.
- Helped maintain operational efficiency and safety standards in high-traffic environments.

EDUCATION

Georgia Institute of Technology, Atlanta, Georgia

December 2024

Bachelor of Science in Computer Science, Threads: People and Media

GPA: 3.26/4.00

TECHNICAL SKILLS

Proficient in **JavaScript, React, Rest APIs, Python, Java, Git**; Familiar with **C, SQL, MongoDB, Express, Node.js, Figma**

PROGRAMMING PROJECTS

Job Application Manager | MongoDB, Express, React.js, Node.js

July 2025

- Developed a full-stack job tracking app with secure user authentication using bcrypt.js and JWT, enabling personalized dashboards for managing job applications.
- Streamlined user workflows by integrating MongoDB for persistent data storage and implementing a responsive React UI, improving job management efficiency.
- Deployed the application using Render and GitHub Pages

Todo List | MongoDB, Express, React.js, Node.js

July 2025

- Built and deployed a full-stack productivity app to learn and apply state management, routing, and API integration.
- Gained hands-on experience with full-stack debugging and deployment pipelines.

Gravity | Figma

April 2024

- Designed a high-fidelity Figma prototype for a college gaming platform using a user-centered design process.
- Conducted interviews, personas, usability testing, and heuristic evaluations to improve accessibility and user safety.
- Delivered a polished prototype informed by UX research and iterative testing.

Groove School | C

April 2024

- Developed a music-driven rhythm game inspired by Floor Kids, focusing on low-level hardware programming for the Game Boy Advance.
- Engineered core systems such as state machines, sound interrupts, sprite animation, and parallax scrolling to create an engaging gameplay experience.

LEADERSHIP AND COMMUNITY ENGAGEMENT

Dance Company at Georgia Tech, Georgia Tech

August 2020 - December 2024

- Performed in multiple campus showcases and community events, collaborating with dancers and choreographers to produce polished stage performances.

Georgia Tech Jazz Ensemble, Georgia Tech

January 2021 - December 2024

- Performed as a clarinetist in university-led jazz concerts, blending improvisation and ensemble coordination.

Society of Black Engineers (NSBE), Georgia Tech

August 2020 - December 2024

- Participated in technical workshops, professional development sessions, and national conferences, expanding skills in software development and leadership.

ADDITIONAL SKILLS AND INTERESTS

Languages: Fluent in **English**; Working Fluency in **Spanish**; Learning **Japanese** and **Portuguese**

Arts: *Fine*- Clarinet, Bass Guitar; *Dance*- Ballet, Jazz, Contemporary, Modern

Interests: Skateboarding, Video Game Design, Gardening, User Experience and Interfaces
